1 Executive Summary

This document presents a comprehensive financial analysis and investment opportunity for Fractal Finance's consumer fintech platform. Our three-phase approach prioritizes product validation and market fit before full monetization, with disclosed capital allocation across each phase.

1.1 Three-Phase Strategy

- **Phase 1A (Months 1-6):** Beta testing with no monetization, focus on product-market fit
- **Phase 1B (Months 7-12):** Public launch with no monetization, user acquisition validation
- **Phase 2 (Months 13-24):** Full monetization launch with optimized unit economics

1.2 Key Investment Highlights

- **Market Opportunity:** Targeting consumer financial management with validated $12/month pricing
- **Phased Approach:** De-risked strategy with product validation before monetization
- **Capital Efficiency:** $175,000 funds complete Phase 1 (12 months) with 15% buffer
- **Strong Unit Economics:** Phase 2 projections show path to 3.0× LTV:CAC ratio by Month 24
- **Content-First UA Strategy:** Multi-channel approach prioritizing sustainable growth channels
- **Competitive Advantage:** Automated cross-account savings features drive 25% better retention than industry average

1.3 Investment Terms

Phase 1 Funding Ask	$175,000
Phase Duration	12 months
Monthly Runway	$14,580
Buffer Built-in	$22,860 (15%)

2 Phase Structure & Timeline

2.1 Phase 1A: Beta Testing (Months 1-6)

Objectives:

- Product development and core feature validation
- Beta user feedback and iteration cycles
- Technical infrastructure establishment
- No monetization - focus on product-market fit

Budget Allocation:

Table 1: Phase 1A Monthly Budget

Category	Monthly	6-Month Total
Marketing & Waitlist Building	$5,000	$30,000
Tech/Infra Costs	$750	$4,500
Contractor Work (As-Needed)	$1,000	$6,000
Compliance	$1,000	$6,000
Flinks/Data Costs	$1,350	$8,100
Total	**$9,100**	**$54,600**

2.2 Phase 1B: Public Launch (Months 7-12)

Objectives:

- Public app launch and market entry
- User acquisition funnel optimization
- Conversion rate validation (without monetization)
- Prepare monetization infrastructure

Budget Allocation:

Table 2: Phase 1B Monthly Budget

Category	Monthly	6-Month Total
Marketing & User Acquisition	$5,000	$30,000
Tech/Infra Costs	$1,200	$7,200
Contractor Work (As-Needed)	$1,500	$9,000
Compliance	$2,000	$12,000
Flinks/Data Costs	$6,600	$39,600
Total	**$16,300**	**$97,800**

2.3 Phase 2: Full Monetization (Months 13-24)

Objectives:

- Launch $12/month subscription model
- Optimize unit economics and LTV:CAC ratios
- Scale proven acquisition channels
- Prepare for next funding round

Projected Performance: Separate funding round required

3 Customer Acquisition Analysis

3.1 Multi-Channel Marketing Strategy

Following successful fintech companies like Wise and Chime[1], we employ a diversified marketing approach:

Table 3: Marketing Channel Allocation & Performance

Channel	**Budget %**	**CPC/CPI**	**Monthly Budget**	**Expected Phase Results**
Phase 1A ($5,000/month)				
Influencer Marketing	36%	$0.90	$1,800	2000 waitlisted users
TikTok/Instagram Ads	24%	$3.00	$1,200	400 waitlisted users
Reddit Finance	20%	$1.00*	$1,000	500 waitlisted users
University Partnerships	20%	$3.00**	$1000	333 waitlisted users
Organic SMM/Growth	0%	*N/A*	$0	250 waitlisted users
Phase 1B ($5,000/month)				
Influencer Marketing	36%	$0.60	$1,800	3000 installs
TikTok/Instagram Ads	24%	$3.00	$1,200	400 installs
LinkedIn	10%	$4.00***	$750	250 installs
Reddit/Communities	10%	$0.80*	$500	625 installs
Referral Program	10%	$5.00	$500	500 installs
Organic SMM/Growth	0%	*N/A*	$0	10,000 installs

Of course, it is important to contextualize these costs. For instance, although Tiktok/Instagram ads have a higher CPC cost, they also offer detailed analytics, guaranteed traction, and a hyper-targeted reach. This premium is similarly justified for university partnerships by the clustered nature of these environments, where trust is high and word of mouth. In addition, The ability to be present enables real-time engagement, and promotes organic growth.

These figures (other than referrals) also assume a 17% engagement rate between clicks and waitlists/installs. We understand per-click figures for a novel fintech app can be lower than other industries, but we plan to increase these figures over time. Specifics about methodology and channel choice can be discussed with the team.

CPI/CPC Estimation Methodology:

- ***Reddit Finance:** $0.50-$1.50 CPC range for niche subreddits[2]. We estimate $1.00 for waitlist signups and $0.80 for post-launch clicks in highly targeted finance communities like r/personalfinance, r/frugal. However, Reddit is known for unresolved botting problems, so we've halved our expected engagement rate
- ****University Partnerships:** Based on $400-$2,185 education sector CAC[3], we estimate $3.00 per waitlist signup and $2.00 per post-launch signup through targeted campus events and student org partnerships
- ***LinkedIn:** $2.00-$5.39 average CPC[4]

[1] Literal Humans, "How we Helped Wise Grow From 0 to Over 1 Million Organic Visits," literalhumans.com
[2] Aimers, "How Much Do Reddit Ads Cost in 2025," aimers.io
[3] UPCEA, "Understanding Cost Per Inquiry in Higher Education Marketing," 2024
[4] WebFX, "How Much Does LinkedIn Advertising Cost in 2025?" webfx.com

Channel Selection Rationale:

- **Content Marketing:** Generates 3× more leads than traditional marketing[5]
- **Social Media:** Lower CPIs for consumer fintech at $2.80-$3.20 range[6]
- **Reddit:** Highly engaged finance communities with 91% of traffic landing on conversation threads[7]
- **University Partnerships:** Direct access to target demographic with trusted institutional backing

3.2 Growth Strategy Assumptions

Our acquisition strategy leverages both paid and organic channels:

- **Paid Acquisition:** Multi-channel focus targeting financially engaged millennials/GenZ
- **Content-First Approach:** Building SEO foundation for long-term organic growth
- **Community Building:** Reddit finance communities and university partnerships
- **Incentivized Referrals:** $5-10 per successful referral driving viral growth

4 Phase 1 Financial Projections

4.1 Complete Phase 1 Budget

Table 4: Phase 1 Total Funding Requirements

Category	Phase 1A	Phase 1B	Total Phase 1
Marketing & User Acquisition	$30,000	$30,000	$60,000
Tech/Infra Costs	$4,500	$7,200	$11,700
Contractor Work	$6,000	$9,000	$15,000
Compliance	$6,000	$12,000	$18,000
Flinks/Data Costs	$9,100	$39,600	$48,700
Subtotal	**$54,600**	**$97,800**	**$152,400**
Buffer (15%)			**$22,860**
Total Required			**$175,260**
Funding Ask			**$175,000**

4.2 Monthly Burn Analysis

Table 5: Phase 1 Monthly Burn Progression

Phase	Monthly Burn	Runway
1A (Months 1-6)	$9,100	6 months
1B (Months 7-12)	$16,300	6 months
Average	**$12,700**	**12 months**
With Buffer	**$14,600**	**12+ months**

4.3 Contractor Cost Breakdown

Table 6: As-Needed Contractor Allocation

Role	Hourly Rate	Phase 1A Total	Phase 1B Total
Development Acceleration	$50-75	$3,000	$4,500
UI/UX Design	$40-60	$1,500	$2,000
Graphic Design	$30-50	$1,000	$1,500
QA Testing	$25-40	$500	$1,000
Total		**$6,000**	**$9,000**

Note: Contractor work allocated on as-needed basis for specific projects, not monthly retainers. Rates based on North American freelance market[8].

[8] Based on Upwork 2025 freelance developer rates for fintech sector

4.4 Flinks/Data Costs Analysis

Table 7: Flinks Account-Based Pricing Model

Phase	Cost per Account	Accounts per User	Monthly Cost per User
Phase 1A	$1.00	3.5	$3.50
Phase 1B	$0.90*	3.5	$3.15

***10% Volume Discount:** Flinks provides 10% pricing reduction at scale during Phase 1B
User Volume Assumptions:

- **Phase 1A:** Average 250 beta users
- **Phase 1B:** Average 1250 users
- **Account Connection:** 3.5 accounts per user average (checking, savings, credit cards)
- **Transfers:** $0.50 per transfer, estimated 4 transfers per user per month*

***Transfer Note:** We've implemented cost optimization strategies including batching multiple transfers together into single API calls at week-end, reducing overall transfer costs. The 5 transfers/month average reflects post-optimization usage.

Table 8: Flinks Monthly Cost Progression

Period	Active Users	Flinks Cost	Transfer Cost	Total Cost
Month 3 (1A)	0	$0	$0	$0
Month 6 (1A)	300	$1,050	$600	$1,650
Month 9 (1B)	1,000	$3,150	$2,000	$5,150
Month 12 (1B)	2,000	$6,300	$4,000	$10,300

Cost Components Included: Flinks account-based pricing covers all authentication, transaction pulling, and balance checks.

5 Tech/Infra Costs Breakdown

Table 9: Phase 1A vs 1B Tech/Infra Scaling

Service	1A Monthly	1B Monthly	1A Total	1B Total
Supabase	$75	$125	$450	$750
OpenAI GPT-4	$150	$225	$900	$1,350
Vonage API	$50	$75	$300	$450
Vercel Hosting	$100	$200	$600	$1,200
Analytics/Tools	$375	$575	$2,250	$3,450
Total	**$750**	**$1,200**	**$4,500**	**$7,200**

6 Phase 2 Monetization Projections

Note: Phase 2 requires separate funding round. Projections provided for strategic planning. We do not expect profitability until Open Banking implementation reduces infrastructure costs.

6.1 Phase 2 Unit Economics Foundation

Building on Phase 1 validation and industry benchmarks showing LTV:CAC improvements from 1.7:1 to 4.7:1 over 12-18 months[9]:

Table 10: Phase 2 Expected Performance

Metric	Month 13	Month 24
Install → Registration	15%	20%
Registration → Paid	5%	15%
Combined Paid Conversion	0.75%	3.0%
Blended CPI	$3.97	$2.50
Customer Acquisition Cost	$530	$83
Monthly Churn Rate	4.45%	4.45%

6.2 Enhanced Retention Through Sticky Features

Our automated cross-account savings features drive superior retention compared to industry averages:

- **Industry Average:** 5% monthly churn, 48% annual retention[10]
- **Fractal Target:** 4.45% monthly churn, 53% annual retention
- **Key Differentiators:**
  - Automated savings rules across all connected accounts
  - Cross-bank optimization algorithms

[9] Geckoboard, "LTV:CAC Ratio KPI example," geckoboard.com
[10] sendbird, "What every fintech app must know about retention?" 2023

- Goal-based automation triggers
- No manual intervention required

Retention Impact: 10% retention increase = 30% higher LTV[11]

6.3 Phase 2 Revenue Projections

Table 11: Phase 2 User and Revenue Growth

Month	Total Paid Users	MRR	ARR
Month 13	63	$756	$9,072
Month 18	500	$6,000	$72,000
Month 24	1500	$18,000	$216,000

6.4 Phase 2 Unit Economics - The Long Game

Table 12: LTV:CAC Ratio Progression

Timepoint	CAC	LTV	Ratio
Month 13	$530	$204	0.38×
Month 18	$160	$204	1.25×
Month 24	$83	$204	2.46×

LTV Calculation: $12/month × 85% margin[12] × 20 months average customer lifetime
Why Poor Early Ratios Make Sense:

- Market education costs for new category
- Trust-building in financial services
- Initial broad targeting before segmentation
- Feature development improving retention over time

Industry data shows 68% of successful fintechs achieve greater than 3:1 ratios within 24 months[13].

7 Path to Profitability

7.1 Core Revenue Model Foundation

Our revenue model centers on high-margin, recurring subscription income with future B2B licensing expansion. Following the introduction of Open Banking in Canada we project to have gross margins of approximately 90%, including all fixed costs.

7.2 Open Banking Acceleration

Canada's upcoming Open Banking framework presents a significant profitability catalyst. The Consumer-Driven Banking Act passed June 2024, with implementation expected early 2026[14].

- **Cost Reduction:** 60-80% reduction in per-user data costs[15]
- **Transaction Speed:** Near-instant cross-bank transfers vs. current 2-3 day EFT delays[16]
- **Enhanced Data Quality:** Direct API access improves reliability
- **Market Opportunity:** 9 million Canadians currently share credentials insecurely[17]

Critical Note: As seen in the above data, Open Banking is central to our profitability and growth as a business. In addition to providing critical data and added functionality, it significantly builds on our current capabilities in relation to budgeting. For instance, the ubiquitous movement of money between accounts and institutions under current rails is either extremely expensive ("instant") or slow (EFT transfers). As such, until the implementation of Open Banking in 2026, our monthly margins will be largely unfavorable. However, as noted in the table below, only 1,200 paid users are needed to break even. We project to reach this point by month 22.

Table 13: Open Banking Impact on Unit Economics (Monthly)

Cost Category	**Current**	**Post–Open Banking**
Flinks/Data Cost per User	\$3.15 – \$3.50	\$0.50 – \$1.00
Transaction Processing	\$2.00	\$0.05 – \$0.10
Combined Infrastructure PUPM	\$5.15 – \$5.50	\$0.60 – \$1.20
Total Fixed Infrastructure Costs	\$7200	\$7200
Breakeven Paid Users Required	**1,200**	**700**

8 Risk Factors & Mitigations

8.1 Phase 1 Specific Risks

Product-Market Fit Risk:

- **Risk:** Beta testing reveals fundamental product issues
- **Mitigation:** 6-month beta phase allows multiple iteration cycles

User Acquisition Risk:

- **Risk:** Higher CPIs than projected with focused spend
- **Mitigation:** Multi-channel diversification and content-first approach

Technical Risk:

- **Risk:** Infrastructure costs exceed projections
- **Mitigation:** 25% buffer provides significant cost overrun protection

8.2 Phase Transition Risk

Monetization Risk:

- **Risk:** Conversion rates lower than projected in Phase 2
- **Mitigation:** Sticky features drive 25% better retention than industry average

Funding Risk:

- **Risk:** Difficulty raising Phase 2 funding
- **Mitigation:** Phase 1 validation provides strong investor metrics

Competition Risk:

- **Risk:** Established players enter automated savings space
- **Mitigation:** First-mover advantage in Canadian Open Banking integration

9 Next Steps & Milestones

9.1 Phase 1A Milestones (Months 1-6)

Table 14: Phase 1A Success Metrics

Metric	Target	Success Threshold
Waitlist Signups	3,500	3,000+
Waitlist → Beta	40%	N/A
Beta User Activation Rate	21%	17%+
Product Iteration Cycles	4	3+

9.2 Phase 1B Milestones (Months 7-12)

Table 15: Phase 1B Success Metrics

Metric	Target	Success Threshold
Total Users Installed	15,000	13,500+
Install → Registration	15%	13%+
Monthly Active Users	1,200+	1,000+
Organic Traffic Growth	300%	200%+

9.3 Phase 2 Preparation

Funding Requirements:

- Estimated Phase 2 ask: $500,000-$600,000
- Based on Phase 1 metrics and Phase 2 projections
- Timeline: Month 10-12 fundraising for Month 13 launch

Phase 2 Success Prerequisites:

- Phase 1B engagement metrics indicate 5%+ paid conversion potential
- Content marketing generates 25%+ of traffic organically
- Retention metrics exceed industry averages by 2×
- Open Banking integration roadmap completed

10 Valuation & Investment Terms

10.1 Investment Structure

Investment Amount	$175,000
Structure	SAFE Agreement
Valuation Cap	$4,000,000
Discount Rate	15%
Conversion	Next priced equity round (preferred shares)

10.2 Capital Allocation Efficiency

Table 16: Funding Allocation

Category	Amount	Percentage
Technical Development & UA	$152,400	87%
Risk Buffer	$22,860	13%
Total	**$175,000**	**100%**

10.3 Valuation Justification

Our $4 million valuation cap reflects strong fundamentals relative to comparable pre-revenue Canadian fintech startups:

- **Technical Readiness:**
  - Working MVP with Flinks integration completed
  - Automated cross-account rule engine built
  - Infrastructure supporting 10,000+ users
  - Open Banking integration roadmap defined
- **Market Validation:**
  - 500+ waitlist signups pre-launch
  - $12/month pricing validated through surveys
  - Partnership discussions with 3 universities
- **Competitive Advantages:**
  - First Canadian platform with cross-account automation
  - No-code approach unique in market
  - Positioned for Open Banking early adoption

Comparable Valuations:

- Pre-seed fintech median: $5.7M (Q3 2024)[18]

[18] Carta, "Industry spotlight: Fintech fundraising trending up in 2024"

- Technical MVP companies: 15-25% discount to median
- Our ask: 30% discount to median reflecting pre-revenue status

Recent Canadian fintech comparables:

- **Paymi competitor:** $5.5M cap, pre-revenue, 2024
- **Wealth management app:** $4.2M cap, 1,000 beta users, 2024
- **Budgeting platform:** $3.8M cap, MVP stage, 2025

10.4 Equity Conversion Terms

- **SAFE Conversion:** Converts to preferred equity at next priced round
- **Liquidation Rights:** Standard 1× preferred share treatment
- **Pro-rata Rights:** Available for investments ¿$100,000

INVESTMENT SUMMARY

Ask: $175,000 for 12-month Phase 1 execution
Offer: SAFE with $4M cap, 15% discount
Deliverables: 3,500 waitlist + 15,000 installs, validated unit economics, Open Banking readiness
Next Round: $500-600K Phase 2 based on metrics

Why Invest Now:

- 18-24 month window before Canadian Open Banking disruption
- Content-first strategy builds sustainable competitive moat
- Sticky automation features drive 25% better retention than industry average
- Technical team with proven fintech experience
- Conservative projections with 15% runway buffer
